Compact Flash to SATA Adaptor

General Description

The Compact Flash to SATA Adapter is designed to provide an interface between the Compact Flash 50 pin Bus and the SATA (Serial ATA) interface standard. Works with DOS, Windows 95, 98, XP, 2000, Linux, Unix, allowing the operating system to boot and run from a Compact FLASH card.

Features

- 5 Volt CF Card Support
- CF Standard Type I/II Card 50 pin Connector
- SATA Standard 15 pin (PWR/SIGNAL) Connector
- Optional Mounting Bracket
- Power and activity LED indicators
- DMA Capable with compatible CF cards

Typical Application

The module connects to the Host PC in the same way that an SATA hard drive is connected – using an SATA signal/power cable. It may be used in any application where an SATA drive may be used:

- Routers, Firewalls
- Internet Appliances, Kiosks
- Industrial Computers

Electrical

Vcc = 5V ± 10%, 120mA RMS Max. (CF card dependent)
Ta = 0°C - 60°C

Mechanical
